- a) One permanent sign is permitted per site. The facial area of a sign shall not exceed 1.0 m² (11 ft²).
- b) In the case of a home occupation, an additional permanent sign is permitted.

- c) No sign shall be located in any manner that may obstruct or jeopardize the safety of the public.
- d) Temporary signs not exceeding 1.0 m² (11 ft²) advertising the sale or lease of the property or other information relating to a temporary condition affecting the property are permitted.

17.2 SUPPLEMENTARY REGULATORY

- a) Council will consider the applications for permitted and discretionary use with respect to the following criteria:
 - i. The infrastructure servicing capacity is available to service the development without excessive impact on other uses being served by the system.
 - ii. The proposed development will be consistent with any concept plans in force in the area and will not be inconsistent with the future use and development plans of the Town of Fort Qu'Appelle Official Community Plan and the Calling Lakes District Plan.
 - iii. The development will not require the development of new streets and utility lines except as may be provide for in existing plans under the Town of Fort Qu'Appelle.
 - iv. Official Community Plan and the Calling Lakes District Plan and that the proposal is not premature.
- b) Where a development is proposed at a location at which standard connection to the Town's existing sewer and water system is not feasible, the developer shall, at their own expense, provide suitable water supply and sewage disposal facilities for that development acceptable to Council and meets *The Public Health Act and Regulations* requirements. Domestic waste disposal systems located on the site and serving only the principal use will be a permitted use to that principal use.
- c) Any building or structure used for the habitation or shelter of animals permitted in this Zoning District shall be located a minimum distance of 76.0 meters (249 ft) from an occupied dwelling situated on an adjoining site.

SECTION 18 ENVIRONMENTALLY SENSITIVE LANDS OVERLAY - ES

The Intent of the Environmentally Sensitive Lands Overlay District (ES) is to restrict development in areas that are considered environmentally sensitive. The following regulations are intended to apply supplementary standards for development in areas designated as having potential environmental sensitivities or natural hazards conditions (unstable slopes, flooding) in order to:

- Restrict development in identified and potentially environmentally sensitive and critical wildlife areas.
- Restrict development in areas that is considered hazardous for development in order to minimize property damage due to flooding.
- Restrict development in areas that are considered hazardous for development for reasons of excessive soil erodability and/or ground instability.

18.1 AREAS WITHIN THE ES OVERLAY DISTRICT

All land within the Environmentally Sensitive Lands Overlay District is shown on the Future Land Use Map and Zoning Map.

18.2 OVERLAY DISTRICT REGULATIONS

- a) All the regulations of the Environmentally Sensitive Lands Overlay District shall be used by Council as a guideline in establishing conditions, which may be applied to location-sensitive Development Permits for the specific use being requested.
- b) With the exception of a single-dwelling, for a proposed development located within the Environmentally Sensitive Environment Area, Council may require the developer to have an environmental assessment carried out by a qualified professional. The site analysis shall identify potential impacts and mitigative measures of the proposed development in the Environmentally Sensitive Lands Overlay District'.
- c) Where a proposed development of a new use and any required access driveway is located within 150.0 meters (492 ft) of an area defined as Environmentally Sensitive land in the Town of Fort Qu'Appelle Official Community Plan or as an Environmentally Sensitive Lands (ES) Overlay District on the Zoning Map, Council may require the applicant to submit sufficient topographic or other information to determine if the development will be within 50.0 meters (164 ft) of any slopes that may be unstable, or within any river or stream flood plain, or other land that may be subject to flooding.
- d) Identified actions for hazard avoidance, prevention, mitigation or remedy for any development proposed in an Environmentally Sensitive Lands Overlay District may be incorporated as special conditions of a Development Permit. Where such special

conditions conflict with any other regulation of this Bylaw, the special conditions shall take precedence. Council shall refuse a permit for any development for which, in Council's opinion, the proposed actions are inadequate to address the adverse effects or may result in excessive costs for the Municipality.

- e) No person shall within an Environmentally Sensitive Lands Overlay District use any land, or erect, alter or use any building or structure, except in accordance with the following provisions.

13.4 PERMITTED USES

- a) Agricultural uses, but not including buildings and structures accessory thereto and does not include irrigation works, Intensive Livestock Operations or Harvest Preserves.
- b) Recreational uses.
- c) Wildlife habitats and sanctuaries.
- d) Natural and nature-like open areas.
- e) Existing Dwellings and accessory buildings.

13.5 UNDESIRABLE USES

The following uses may be permitted only by resolution of Council and only in locations specified in such resolution of Council:

- a) One detached one unit dwelling, RTM or modular home following the placement thereof on a permanent foundation, and buildings accessory thereto subject to appropriate site development regulations (slope instability or flood proofing);
- b) Home occupations, home-based businesses (Refer to Section 5.1).
- c) Oil and gas development.
- d) Drainage ditches, culverts and other drainage works.
- e) Public utilities, buildings, and structures, warehouses and storage yards excluding solid and liquid disposal waste facilities.

13.6 CRITICAL WILDLIFE HABITAT DEVELOPMENT REGULATIONS

- a) Where development is proposed in an area identified as containing critical wildlife habitat, the Development Officer may require the applicant to provide additional information as required by *The Wildlife Habitat Protection Act (WHPA)* and any other relevant Provincial Regulations.
- b) Council may prohibit development and recommend subdivision refusal where proposals may adversely affect long-term wildlife conservation and may specify development and subdivision requirements based on reports from qualified consultants or officials from the Provincial government.

- c) All development and subdivision proposals on private and Crown Lands which are within a Critical Wildlife Management Area shall conform to:
 - i. The Critical Wildlife Habitat Act (CWhA) requirements.
 - ii. The Critical Wildlife Habitat Lands Disposition and Alteration Regulations Requirements.
 - iii. Council specified wildlife development, management, conservation, mitigative and rehabilitation development standards to maximize long-term wildlife protection.

18.6 SITE DEVELOPMENT REGULATIONS FOR SLOPE INSTABILITY AREAS

- a) No new development shall be permitted in any readily eroded or unstable slope area if the proposed development will be affected by or increase the potential hazard presented by erosion or slope instability.
- b) For the purpose of this Bylaw, the area considered to present potential erosion and/or slope instability hazard includes but is not limited to the slopes, any tributary creeks, and gullies.
- c) Council may require a surveyor to determine where this line or crest of valley is located at the developer's expense and development will be set back from that line at all points.
- d) Any application for a Development Permit on any parcel of land that lies wholly or partially within an area identified in the "Environmentally Sensitive Lands Overlay Area" must be accompanied by a detailed site analysis prepared by a geotechnical engineer registered in the Province of Saskatchewan. The site analysis shall indicate topography, surface drainage, geological, and geotechnical conditions at the site of the proposed development and related to the conditions of the general area as they relate to slope instability and erosion hazards.
- e) The geotechnical engineer shall answer the following questions:
 - i. Will the proposed development be detrimentally affected by natural erosion or slope instability?
 - ii. Will the proposed development increase the potential for erosion or slope instability that may affect the proposed development, or any other property?
- f) Unless the geotechnical engineer can answer "no" in response to both of the above questions, further analysis will be required. The required analysis must define the hazard as it may affect the proposed development and any other potentially affected property. The engineering report will identify hazard mitigation measures including engineered works and other measures deemed to be effective in eliminating or managing anticipated erosion and slope stability impacts, and will identify and explain

- known and suspected residual hazards. The responsibility for monitoring and responding to monitored findings shall be resolved before approval is granted.
- g) If such an evaluation is not done, or having been done, Council determines that excessive remedial or servicing measures are necessary to safely and efficiently accommodate the proposed development, Council shall not be required to approve the application for development.
 - h) Where a parcel of land borders on or contains a water body, the setback from the bank of the water body shall be determined by the Municipality but shall not be less than 30.0 meters (98 ft) from a water body of 8 hectares (20 acres) or more.

18.7 SITE DEVELOPMENT REGULATIONS FOR FLOOD HAZARD CAUTIONARY AREAS

- a) For all proposed development in this cautionary area, the developer shall be responsible to obtain and determine the 1:500 year Estimated Peak Water Level to determine the Safe Building Elevation. The Water Security Agency will assist and provide comment when possible or the developer shall be responsible for the cost.
- b) No person shall use any land, erect, alter or use any building or structure within a Flood Hazard Land Area without a development permit. A development permit shall not be issued for any land use, erection, alteration or use of any building or structure unless the site/development meets approved flood proofing measures to the 1:500 flood design elevation.
- c) Development of buildings and additions to buildings shall be prohibited in the flood way of a watercourse or water body.
- d) Development of buildings and additions to buildings in the flood fringe of a watercourse or water body shall be flood proofed to the 1:500 flood design elevation.
- e) No person shall backfill, grade, deposit earth or other material, excavate, or store goods or materials on these lands nor plant any vegetation parallel to the waterflow.
- f) "Hazardous Substances and Waste Dangerous Goods" are prohibited, as defined by the Hazardous Substances and Waste Dangerous Goods Control Regulations of the *Environmental Management and Protection Act of Saskatchewan*.
